WAXIE® SANITARY SUPPLY Bags that work for you...and the environment!

Remember, you buy a plastic bag to perform a very specific function – to contain and transport trash from point A to point B without tearing or leaking. We have engineered a bag that gets the job done without wasting plastic – this can also lead to cost savings.

All bags produced in our Rancho Cucamonga facility meet the state of California requirements for PCR content.

DuraStar CAN LINERS

Source Reduction Engineering

Source Reduction through Technology

Advanced Polymer Blends

- High quality prime resin
- Star-Seal– the strongest seal available
- Improved performance at thinner gauges

Savings Why buy more plastic than you need? Better performance at thinner gauges means purchasing less plastic for the same job.

Source reduction facts

- Less plastic is needed for the same job
- Reduces greenhouse gas emissions
- Single bag provides superior strength for transport

Source Reduction through Research

The "Right-Size" Product Line

Quick Pick Liner Matching System

Don't buy more bag than you need!

1. We identified the most common cans in the market place.
2. Each can was hand tested for the right-size with proper overhang.
3. A "Right-Size" product line was designed that eliminates guess work, and saves you money

- Ensures the correct match between liner and can
- No more guess work– the Right-Size product line
- Prevents the bag from falling into can

Savings Eliminates the purchasing of oversized bags, and promotes product consolidation and SKU reduction.

Source reduction facts

- Reduces plastic going into landfills
- Ensures plastic is not wasted due to over-sizing
- Improves supply chain efficiencies– packaging and transportation etc.

Source Reduction through Minerals

Nature's Mineral Strength

Up to 14% Natural Materials

Non-Petrochemical Reinforcement Additive

- A natural reinforcement additive
- Greatly enhances the durability of the bag
- Non-petrochemical, abundant and all-natural

Savings With enhanced durability and dependability, product failures becomes nearly obsolete, creating better workplace efficiencies.

Source reduction facts

- Reduces energy used to produce bag
- An abundant all-natural mineral
- Reduces the reliance upon petrochemical materials
