WAXIE GPS®

GREEN PARTNER SUPPORT™

Guides You On The Path To More Sustainable Cleaning Solutions

WAXIE green

Green Cleaning Technology with an Environmental Conscience

GPS® Green Partner Support™

Everything you need when you want to go green!

GPS® GREEN PARTNER SUPPORT™

GPS Green Partner Support is a comprehensive approach to helping our customers clean green.

GPS encompasses all aspects of the cleaning process: proper cleaning procedures, processes and planning to safely and effectively clean buildings, as well as the cleaning chemicals, equipment, and accessories required to perform the cleaning function.

GPS seeks to have a positive effect on the health of building occupants and cleaning personnel, while also striving to minimize any negative effects on the environment.

GPS is a blueprint for best practices, is continually seeking improvements.

GPS identifies third-party certifications and guidelines whenever available to substantiate environmentally preferable claims. Such as:

- EPA Comprehensive Procurement Guidelines
- EPA DfE
- EcoLogo
- Green Seal
- SCS Certified (Green Cross)
- Carpet & Rug Institute Green Label
- Leadership in Energy and Environmental Design (LEED®)

WAXIE offers GPS Green Partner Support for its green-committed end user customers who would like to collaborate on implementing a green cleaning program that combines environmentally preferred products with good sound cleaning procedures, training and expertise to create an effective and safe cleaning program.

GREEN CLEANING

Green cleaning can be defined as "effective cleaning that protects health without harming the environment."

A holistic approach to green cleaning will incorporate solutions that consider human health and environmental impacts in a way that thoughtfully addresses:
- products, equipment and tools
- processes and procedures
- commitment to continuous improvement

WAXIE offers GPS Green Partner Support for customers looking for a comprehensive approach to cleaning green.

GPS® Suite of Tools & WAXIEapps™

GPS® SUITE OF TOOLS

Green Cleaning Team Worksheet

Use to: identify "Green Cleaning Team"; establish customer goals so appropriate green cleaning recommendations can be made; frame conversation of initial meeting regarding green cleaning; and schedule appointment to conduct Green Cleaning Site Survey.

Green Cleaning Site Survey

Use to: frame questions on facility walk through; for notes on general cleanliness of facility, current cleaning methods and current products; identify applicable LEED® for Existing Buildings: Operations & Maintenance (EB:OM) Green Building Rating System credits where WAXIE can help; and as a quick glance LEED checklist for green cleaning credits.

Green Cleaning Product Survey

Use to: frame product recommendations after Green Cleaning Site Survey; identify current products and cleaning applications; recommend green cleaning product alternatives; and identify green cleaning certification or attribute of the recommended product.

Green Cleaning Training Log

Use to: identify green cleaning training opportunities; keep track of customer employees who have been trained on green cleaning topics; and reinforce the idea of continuous improvement in green cleaning program.

Sustainable Cleaning Product Worksheet

Use to: identify green cleaning product purchases as well as total spend; measure the percentage of "green spend" each month (can also be used for specific LEED calculation). Drop down menu to identify green product certification or attribute. Information from each month rolls up to dashboard that shows year to date green spend percentage.

WAXIEapps™

WAXIEapps are consultative software tools designed to help WAXIE's Sanitary Maintenance Consultants identify the most efficient and cost-effective cleaning solutions for their customers' facilities. By using WAXIEapps to analyze a cleaning operation, WAXIE Consultants can make recommendations that will save labor, materials and money. Contact your local Sanitary Maintenance Consultant for additional information.

WAXIEapps are professional software tools focused on the cleaning labor bottom line.

GPS Guides You On The Path To

WAXIE green

The WAXIE-Green label identifies environmentally preferable products in the WAXIE private label line that contribute to an effective green cleaning program.

CLEANING CHEMICALS

STEP 1

Start with low environmental impact cleaning chemicals and dispensing systems, including third-party certified (i.e. Green Seal, EcoLogo, Scientific Certification Systems) and biobased chemicals, and other products with a more environmentally preferable profile (i.e. EPA DfE).

CLEANING TOOLS & EQUIPMENT

STEP 2

Utilize low environmental impact cleaning tools and equipment, including vacuum cleaners and carpet extractors certified by the Carpet & Rug Institute, microfiber technology and much more.

ENTRYWAY MATTING SYSTEMS & BUILDING SITE MAINTENANCE

STEP 3

Reduce the amount of dirt entering the building and develop cleaning strategies to maintain your entryway systems as well as exterior walkways.

RECYCLING

STEP 4

Divert waste from landfills with a recycling program for paper, plastic & glass, as well as light bulbs and batteries.

More Sustainable Cleaning Solutions

STEWARDSHIP & CONTINUOUS IMPROVEMENT

STEP 8

Partner with WAXIE to implement and communicate low environmental impact cleaning policy and training. Commit to continued improvement in your maintenance operation, implement an Environmental Management System (EMS) and pursue LEED® certification for your building. Start with a Green Cleaning Site Survey from WAXIE.

WORKPLACE WELLNESS

STEP 7

Fight the spread of germs in your workplace through hand washing and use of hand sanitizers.

SANITARY PAPER PRODUCTS & TRASH LINERS

STEP 5

Promote source reduction and use products that are third-party certified (i.e. Green Seal, EcoLogo, Scientific Certification Systems), meet EPA guidelines for post-consumer recycled content, or are derived from rapidly renewable resources.

WATER EFFICIENT ACCESSORIES

STEP 6

Conserve water and increase hygiene with no-touch restroom accessories.

WAXIE-Green Products

WAXIE-Green Cleaning Chemicals (Dilution Control)

WAXIE-Green Solution Station & Portable Dilution Control (PDC) chemicals are certified by EcoLogo, SCS (Scientific Certified Systems), Greal Seal, EPA DfE and CRI Seal of Approval, depending on the product.

SOLSTA chemicals are available for use in a range of areas, from all purpose cleaners and glass & surface cleaners to restoom and carpet cleaners.

WAXIE-Green Aerosols

WAXIE-Green Aerosols truly represent the next generation aerosol system with innovative chemistry and a revolutionary propellant system. The advanced propellant system produces incredibly low VOC content while maintaining high-foaming action and high-performance.

WAXIE-Green Cleaning Chemicals (Bulk & RTU)

WAXIE-Green Floor Care System

EcoLogo certified, WAXIE-Green Floor Care utilizes the latest self-crosslinking technology to produce a high-quality modified acrylic floor finish without the use of metal-crosslinkers.

WAXIE-Green Carpet Care System

EcoLogo certified, formulated in partnership with EPA DfE and have the CRI Seal of Approval, the WAXIE-Green Carpet Care system utilizes encapsulating technology to bind the soil, which is then removed through daily vacuuming.

WAXIE-Green RTU & Bulk Chemicals

EcoLogo certified and SCS certified for biodegradability, WAXIE-Green ready-to-use and bulk chemicals are a solution for customers committed to sustainable cleaning.

Experience the Benefits of Microfiber

- Contributes to better indoor air quality with superior dust and dirt containment
- Source reduction – use less water and chemicals
- Lasts longer than conventional products

COLOR-CODING:

Reduces the risk of cross-contamination by identifying use in different departments and surface areas. Choose the right color for your cleaning procedure.

WAXIE-Green Paper Products

100% Recycled Paper - Green Seal™–Certified

- 65% post-consumer recycled content
- 35% post-industrial recycled content
- Exceeds EPA Comprehensive Procurement Guidelines for post-consumer recycled content
- Processed chlorine free

Packaging

- Boxes 40-45% percent recycled content
- Wrap 75-100% percent recycled content
- Cores 100% percent recycled content
- Environmentally preferable dyes and inks

WAXIE-Green Can Liners

WAXIE-Green High Density Liners contain a minimum of 10% post-consumer recycled content, and contain a reinforcement additive made from natural, non-petroleum mineral material. Their thinner gauge helps contribute to source reduction.

WAXIE-Green Linear Low Density Liners contain a minimum of 10% post-consumer recycled content and 75% total recycled content. These liners are among the first in the industry to receive third-party certification for recycled content from Scientific Certification Systems.

Both high- & low-density liners meet EPA Comprehensive Procurement Guidelines for post-consumer recycled content. Packaging is made from 20% post-consumer recycled content.

WAXIE-Green Certified Hand Soaps

Third-party certified WAXIE-Green hand soaps are offered in a complete line of products and delivery systems that promote hand hygiene in a way that is easy to implement and effective.

WAXIE-Green Eco-Mats

New wiper mat that is made of 100% recycled P.E.T. fiber surface bonded to a vinyl backing. Quality plush surface wipes and dries shoes and grasps fine dust while retaining more moisture than other standard wiper mats. Premium vinyl backing with natural organic resin blend prevents water from floor deterioration and trip/fall hazards due to slippery floors.
