

# WAXIE-Green™ Paper Products

High Quality Green Seal® Certified Paper

The Most Trusted Name In Clean. Since 1945.

## WAXIE makes it easy to be green.

High quality WAXIE-Green™ products incorporate the latest cleaning technology in order to deliver superior cleaning results, and include products that have been certified by third-party ecolabels.

In addition to providing cleaning performance, WAXIE-Green products are also formulated to reduce potential impacts on human health as well as the environment. WAXIE-Green products offer a compelling combination of performance, price, health and safety, along with an environmentally preferable profile.

# WAXIE-Green shows you how to be sustainably savvy.

WAXIE offers several sanitary paper product options which can help your facility reach its sustainability goals. Hand towels, bath tissue and facial tissue are available in options which have been certified by Green Seal®, contain post-consumer recycled content which meet the EPA guidelines, or are derived from rapidly renewable resources. Hand towels and bath tissue are also available in controlled dispensing systems which help to reduce over-usage and waste. Products which have earned these certifications or have these attributes can help a project pursuing LEED® certification, or a campus pursuing an AASHE STARS® rating, or an organization pursuing CIMS-GB certification.

## According to Green Seal's Choose Green Report (March 2004):

- Use of post-consumer fibers reduces the impact on landfills by saving 3.3 cubic yards of space for every ton of paper that is rechanneled
- Every ton of 100% recycled paper saves an estimated 4,100 kilowatt-hours of energy, 7,000 gallons of water and 60 pounds of air pollutants
- If all paper towels were made with 100% recycled materials, approximately 1 million tons of used paper would be kept out of our waste stream
- If recycled materials were not used to manufacture bathroom tissue, 3.5 tons of virgin wood would be needed in order to manufacture one ton of bathroom tissue

## WAXIE-Green™ Papers:

- 100% Recycled Paper
- Green Seal® Certified
- 65% post-consumer recycled content
- 5% post-industrial recycled content
- Exceed EPA Comprehensive Procurement Guidelines for post-consumer recycled content
- Processed chlorine free

## WAXIE-Green™ Product Packaging

- Boxes are made with 40-45% percent recycled content
- Wraps are made with 75-100% percent recycled content
- Cores are made with 100% percent recycled content
- Environmentally preferable dyes and ink are used

## WAXIE GPS® Green Partner Support™

**WAXIE GPS®** Green Partner Support is an ideal platform for customers who would like to implement a green cleaning program, which combines low environmental impact cleaning products with good sound cleaning procedures, along with the training and consultative expertise needed in order to create a more effective and safe cleaning program.

**WAXIE GPS®** identifies third-party certifications and guidelines whenever available to substantiate environmentally preferable product claims – such as EPA Comprehensive Procurement Guidelines (CPG), EPA Safer Choice, UL Environment®/ECOLOGO®, Green Seal®, CRI Seal of Approval, Forest Stewardship Council® (FSC®), Clean Air Choices Cleaner Certification (CACC), USDA BioPreferred Program and others – and includes the demonstrated knowledge of the LEED® Accredited Professionals and CIMS-GB ISSA Certification Experts employed by WAXIE.

**WAXIE GPS®** is a collaboration and partnership between WAXIE and its respective customer and manufacturer partners – and it is a comprehensive approach which addresses everything you will need to implement an effective green cleaning program.

Your WAXIE Account Consultant partners with you to customize a **WAXIE GPS®** path to help you reach your green cleaning goals.

## GREEN SEAL®

Green Seal is a US-based independent non-profit organization founded in 1989 to identify and promote products and services that have less impact on human health, the environment and our natural resources. Green Seal certified products have met strict criteria for reduced toxicity, reduced packaging and required performance testing, as verified by a third-party review and a manufacturing site audit, as well as ongoing compliance monitoring.

Green Seal's mission is to use science-based programs to empower consumers, purchasers and companies to create a more sustainable world. Green Seal has 32 standards in over 375 product categories including Sanitary Paper Products (GS-1), Institutional Cleaners (GS-37), Institutional Floor Care Products (GS-40), Institutional Hand Cleaners (GS-41) and Institutional Specialty Cleaners (GS-53).

A professional in the cleaning industry can choose to utilize the Green Seal product certification standards to specify and source third-party certified products which have a more sustainable profile. Green Seal certified green cleaning products in the categories of Institutional Cleaners and Carpet Care (GS-37), Institutional Floor Care Products (GS-40), Institutional Hand Cleaners (GS-41), Institutional Specialty Cleaners (GS-53) and Sanitary Paper Products (GS-1) can help a facility reach its overall sustainability goals, and can potentially contribute to LEED O+M certification for the building or CIMS-GB certification for the cleaning service provider.

For more information on Green Seal, please visit [www.greenseal.org](http://www.greenseal.org).

WAXIE has several Green Seal certified products from which to choose, including all-purpose cleaners, glass cleaners, neutral floor cleaners, restroom cleaners, carpet cleaners, hand soaps, hand sanitizers, floor finishes, floor finish enhancers, floor strippers, and sanitary paper products. Your WAXIE Account Consultant can work with you to design and implement a customized green cleaning program which includes Green Seal certified products.

## EPA COMPREHENSIVE PROCUREMENT GUIDELINES (CPG)

The U.S. Environmental Protection Agency (EPA) is a federal government agency founded in 1970 whose mission is to protect human health and the environment. The Comprehensive Procurement Guidelines (CPG) is the buy-recycled program authorized by Congress under the Resource Conservation and Recovery Act (RCRA) and is part of the EPA's continuing effort to promote the use of materials recovered from solid waste. The EPA designates products that are or can be made with recovered materials and recommends practices for buying these products, including by establishing desired ranges of post-consumer and total recycled materials content.

A professional in the cleaning industry can choose to utilize EPA CPG-designated recycled fiber amounts to specify and source products which have a more sustainable profile. Green cleaning products which contain recovered content in the categories of paper towels (40–60% post-consumer fiber content), bath tissue (20–60% post-consumer fiber), facial tissue (10–15% post-consumer fiber), paper napkins (30–60% post-consumer fiber), industrial wipers (40% post-consumer fiber), and plastic trash liners (10–100% post-consumer fiber) can help a facility reach its overall sustainability goals, and can potentially contribute to LEED O+M certification for the building or CIMS-GB certification for the cleaning service provider.

For more information on EPA CPG, please visit <https://www.epa.gov/smm/comprehensive-procurement-guideline-cpg-program>.

WAXIE has several EPA CPG designated products from which to choose, including sanitary paper products and plastic trash liners which meet or exceed the EPA's recommended levels of post-consumer recycled content. Your WAXIE Account Consultant can work with you to design and implement a customized green cleaning program which includes products which meet the EPA CPG for post-consumer recycled content.

# WAXIE green™

WAXIE's innovative line of products  
that incorporate the latest  
**Green Cleaning Technology**

High quality WAXIE-Green products incorporate the latest cleaning technology in order to deliver superior cleaning results, and include products that have been certified by third-party ecolabels.
